

# I SUFFERED FROM SPS\*

## \**Snoring Partner Syndrome*

Do you suffer from SPS? I did... and so do millions of others. SPS, also known as Snoring Partner Syndrome, could ruin your life without proper treatment. This little known syndrome can cause disabling side effects including:

- Sleepless nights
- Crankiness
- Premature aging
- Intense desire to smother someone with a pillow

If you have a bed partner who snores, do what I did – call Fresno Snoring and Sleep Therapy today! Doctors Kary and Edward Karahadian have been treating SPS by stopping snoring and sleep apnea for over a decade. They helped me. And they can help you too.
